## IPTV from Netvue at Addison Lee

IPTV is the convergence of television distribution with IT data network infrastructure. IPTV has rapidly become the industry standard for TV and audio-visual distribution around buildings.

Addison Lee bought an IPTV system from Netvue in 2018 in preparation for their move into a new London headquarters. Their IPTV system is used to distribute live broadcast TV and in-house computer content to the reception area, meeting rooms, and throughout their offices.

## Benefits of IPTV

- IPTV uses the existing computer network - no new cables, no hassle!
- Digital picture quality - immune from noise, distortion and signal loss
- Remote IPTV system management using a web browser
- Unlimited channels with controlled user access
- TV available from any network point throughout the business
- Television delivered direct to PC and Mac desktops on the IT network

## Netvue's IPTV expertise

Netvue specialises in IPTV and Video on Demand systems, with the addition of Digital Signage where desired as an enhancement to the IPTV channels. By concentrating on just these technologies we have built-up great expertise in this field.

As an **independent** systems integrator, we can advise you on equipment from a variety of manufacturers and suppliers without bias, ensuring you get a value-for-money system that really works for your business.

Netvue carry out all the system installation work for an IPTV project; from rooftop satellite dishes right through to the desktop clients for PC and Mac computers. We can advise on the network infrastructure to support IPTV and if needed supply network equipment and cabling.

We are proud to offer a professional service to all our clients, new and old. We have the skills and the experience to specify, design and install the right IPTV system for your company, and one that will serve your business reliably for years to come.
